

X350 PISTON

The Caliber® X350 piston is a high performance flex lip urethane bonded piston designed for high pressure and high abrasion applications. This piston uses nano-technology to produce extreme abrasion resistance and will operate in temperatures up to 250°F. The X350 performs well in brine, WBM, OBM and synthetic drilling muds. One piston solution from spud to total depth. Longer piston life equates to longer liner life, greatly reducing downtime and operating costs associated with mud pump expendables.

BENEFITS

- ◆ Designed for all drilling muds
- ◆ Best in higher abrasion applications up to 250°F
- ◆ Best for high pressure applications up to 7500 psi
- ◆ Bonded dual durometer urethane design for longer life
- ◆ Excellent chemical and abrasion resistance
- ◆ Flex lip design
- ◆ Forged steel hub
