

JM 300 TOP DRIVE VALVE

The Premium Oilfield Technologies JM 300 Top Drive Valves can be used for both blow out prevention and mud control during drilling operations. Our manually or hydraulic crank operated kelly valves are installed at each end of the kelly, or below the top drive, to control flow from the wellbore and protect surface equipment from high pressure kicks. The compact one-piece design is ideally suited where space is at a premium or where handling weight is critical. Its smooth OD allows this valve to be run anywhere in the drill string.

BENEFITS

- ◆ One piece body with full drift bores
- ◆ Can be remotely actuated with Rotary Hydraulic Actuator
- ◆ Balanced stem stop design for accurate, robust stopping and proper ball alignment
- ◆ Utilizes high temp Teflon® seat seal, in floating ball and seat design for bi-directional operation
- ◆ NACE trim, 15,000 psi working pressure
- ◆ Reliable, field proven serviceable design
- ◆ Corrosion resistant materials and coatings
- ◆ Valves can be ordered with or without locking splines

Connection	Thread	OAL	Part Number
Box x Box	6-5/8" reg	22.50*	540-0001
Box x Pin	6-5/8" reg	20.59*	540-0010

*Other sizes and configurations are available upon request
